Our Services

- ◆ **Food and Agriculture Testing**
- ◆ **Water Testing**
- ◆ **Environmental Samples Testing**

About HPC FOODS Ltd Laboratory

As the first Food Microbiological Accredited Laboratory in Hawaii, HPC Foods Laboratory is dedicated to delivering top-notch testing services focused on food, food products, water and environmental samples testing. With an unwavering commitment to excellence, we take pride in being a trusted testing laboratory for over a decade.

Our priority is ensuring the safety and quality of food, food products & water in food processing and related industries. With a strong dedication to public health, we play a critical role in promoting consumer confidence through our testing/analysis services. Our range of tests ensures your products meet the current food safety requirements.

HPC Foods Laboratory operates as a fully independent testing facility, separate from HPC Foods processing. We are committed to delivering reliable and accurate testing services while safeguarding the confidentiality of our clients and protecting the integrity of their products through strict impartiality and professional objectivity.

At HPC Laboratory, maintaining a high standard of quality is our top priority. We adhere to the globally recognized ISO 17025:2017 standard, ensuring stringent Quality Control and Assurance.

We utilize globally recognized test methods and standards such as AOAC, and IS to define our testing practices. Moreover, we also cater to our customer requirements by providing sample collection materials such as swabs, sample bags, sterilized containers etc.

Mission

- Continuous improvement: efficiency, accuracy, training, PT, impartiality
- Collaboration and communication between all stakeholders
- Compliance with standards

Vision

- Leading provider for microbiological testing for food
- Testing accuracy, timely results
- Goal of providing safe and healthy food to people of Hawaii
- Customer satisfaction

Current Testing Scope of Accreditation

Food and Agriculture Testing

Cooked Foods, Ready-to-Eat Food Products, Dry Food Products, Raw Materials and Food Ingredients, Seafood and Raw Meat, Processed Foods

Microbiological Testing: Aerobic Plate Counts, Total Coliform, E. coli, Yeast and Molds

Pathogen Testing : Listeria monocytogenes, Salmonella spp., Top 7 STEC, E. Coli O157:H7.

Chemistry (non-accredited): Total Solid, Moisture Content, pH, water activity

Potable Water Testing

Water used for Processing, Water for Ice production, De-ionized/De-mineralized, Distilled Water, Bottled water/ Drinking Water, Pool Water, Treated Water. Boiler Water/ Chiller Water

Microbiological Testing: Total Coliform, E.coli, Heterotrophic Plate Counts (HPC)

Pathogen Testing : Salmonella, E. coli O157:H7

Waste Water Testing

Untreated Wastewater, Treated Wastewater, Wastewater from Intermediate Tanks

Microbiological Testing : Fecal Coliform (Coming Soon), E.coli, Legionella (Coming soon)

Pathogen Testing : Salmonella, E. coli O157:H7

Environmental Monitoring Sample Testing

Environmental sponge swabs, Quick swabs for food contact surfaces
Environmental fluid samples , Air quality samples

Microbiological Testing : Aerobic Plate Counts, Yeast and Mold

Pathogen Testing : Salmonella, Listeria Spp

Sample collection materials and consumables

- Environmental Sponge Stick Swabs
- Quick Swabs
- Sample Bags for water and Food Sampling
- Sterile containers
- Allergen strips, ATP testing
- Other consumables

Sampling materials are available upon request to provide convenience for customers who do not test frequently. This ensures you do not need to purchase and store materials unnecessarily, offered at a reasonable price.
